

SGS CERTIFICATION of the Swisscom Ltd 2014 GRI Sustainability Report

SCOPE

SGS was commissioned by Swisscom to conduct an independent assurance of the GRI-based disclosure on sustainability in 2014. Our assurance scope included the GRI disclosure obligations and figures in accordance with the GRI Index published at www.swisscom.ch/GRI-2014/en. The scope of the assurance, based on the SGS Sustainability Report Assurance methodology, included all texts and 2014 data in accompanying tables contained in the printed Annual Report 2014 and referenced information on the webpage of Swisscom as quoted in the GRI index. The assurance process did not consider any data from previous years.

CONTENT

The Board of Directors or the Managing Director and the Management of the organisation are responsible for the details provided in the annual report and on the website and in the presentation. SGS was not involved in the preparation of any of the material included in the GRI Index and acted as an independent assessor of the data and text using the Global Reporting Initiative Sustainability Reporting Guidelines, Version 4 (2013) as a standard. The content of this Assuror's Statement and the opinion(s) it gives is the responsibility of SGS.

CERTIFIER INDEPENDENCE AND COMPETENCIES

The SGS Group is active as a globally leading company in the areas of assurance, testing, verifying and certifying in more than 140 countries and provides services, including the certification of management systems and services. SGS confirms that it is independent from Swisscom. It is unbiased and no conflicts of interest exist with the organisation, its subsidiaries and beneficiaries. The assurance team was assembled based on knowledge, experience and qualifications for this assignment.

METHODOLOGY

The SGS Group has developed a set of protocols for the assurance of Sustainability Reports based on current best practice guidance provided in the Global Reporting Initiative Sustainability Reporting Guidelines, Version 4 (2013). SGS has also certified the environmental management systems of Swisscom (Switzerland) Ltd., Swisscom Broadcast Ltd. and Calex Ltd., and SGS has certified the environmental management system of Swisscom IT Services Ltd., in accordance with ISO 14001:2004. In addition the greenhouse gas inventory of Swisscom Ltd is going to be verified according to ISO 14064.

The assurance comprised the evaluation of external sources, meetings with relevant employees, a verification of the documentation and recordings as well as the validation of these with external institutions and/or beneficiaries, where required. Financial data drawn directly from independently audited financial accounts was not checked back to its source as part of this assurance process.

OPINION

The statements in the report refer to the system threshold disclosed (Group companies based in Switzerland). On the basis of the above methodology, we did not detect any instances from which we would have to conclude that the information and data disclosed by Swisscom Ltd. in accordance with the GRI Index 2014 may be incorrect. The information and data disclosed represent, to our mind, a fair and balanced picture of the sustainability efforts made by Swisscom in 2014. The implementation of the GRI-relevant instructions was carried out at those parties involved, where Swisscom regarded them to be significant or feasible. In an internal report, we made recommendations in regard to the further development of the sustainability report as well as the management system. We believe that the existing gaps are not significant and the sustainability report meets the requirements of the option "comprehensive" of the GRI, Version 4 (2014) in accordance with the GRI Index.
